

THE UNIVERSITY OF TENNESSEE

PERFORMANCE TESTED BULL SALE

BULL DEVELOPMENT & EVALUATION PROGRAM

December 12, 2024 | Noon CST

**Middle Tennessee AgResearch & Education Center
1000 Main Entrance Drive
Spring Hill, TN 37174**

University of Tennessee
Bull Development &
Evaluation Program

December 12, 2024
Noon, CST

Angus ■ SimAngus ■ Hereford ■ Simmental

Middle Tennessee AgResearch & Education Center
1000 Main Entrance Drive
Spring Hill, TN 37174

Announcements from the auction box will
take precedence over the information printed
in the sale book announcements.

Auctioneer:
Tommy Barnes

Test Director:
Saulo Zoca
Office: 931-486-2129
Email: szoca@utk.edu

Troy Rowan
Office: 865-974-3190
Email: trowan@utk.edu

We would like to express our sincere gratitude to
Lee Maddox and **Thomas Capps** with the
Tennessee Farm Bureau Federation for their willingness
to provide video and editing for the sale.

GENERAL INFORMATION

Purpose

- Provide a standard, impartial post-weaning gain test, and development program
- Record performance and phenotypic data that will be useful to the buyer and the consignor for making future breeding decisions
- Provide a source of, and market for, performance-tested bulls that meet industry needs
- Serve as an educational tool for bull development as well as beef cattle improvement and promotion

Location

Middle Tennessee AgResearch & Education Center
1000 Main Entrance Drive
Spring Hill, TN 37174

Centrally located in the state and conveniently accessible from Interstate 65 (via 840 from east or west) approximately 40 miles south of Nashville.

Management, Facilities

- Administration of the program is provided by the University of Tennessee Institute of Agriculture.
- Management of the bulls and data collection is provided by staff at the Middle Tennessee AgResearch & Education Center; coordinated by Kevin Thompson, Director of MTREC, and Saulo Zoca, Assistant Professor – Extension Beef Cattle Specialist.
- Education programming and bull marketing assistance is provided by the UT Department of Animal Science and coordinated by Dr. Troy Rowan, Assistant Professor – Beef Cattle Genomics and Dr. Saulo Zoca.
- The Tennessee Beef Cattle Improvement Association (TBCIA) provides administrative consultation, manages the self-insured program, and administers sale proceeds.
- All bulls listed in this catalog have genomic enhanced EPD. All EPD have an accuracy greater than 0.25, thus accuracy values are not listed. For a full list of EPD and exact accuracy visit the appropriate breed association website.

Sale Management

- Public live auction with online simulcast
 - Sale management may choose to offer online pre-bidding if available, but final sale price is determined at live auction.
- Eligible bulls will be cataloged and videoed for distribution via hard copy and online media platforms prior to sale
- Consignors may choose not to catalog or offer eligible bulls for sale
 - Consignors must notify the test manager before the off-test weigh date if any bulls are to be retained for home use and not sold.
- Consignors may retain a semen interest in any bull (up to 50%), but full possession must be sold (i.e., fractional possession offerings will not be available)
- Proceeds from the sale of each bull will be collected by sale management and the balance after final settlement returned to the consignor
- Transfer of registration, and associated cost, is the consignor's responsibility

Health Status

All bulls that have been entered into the UT bull evaluation have been vaccinated and received booster vaccination with Express FP10 – MLV – IBR, BVDV 1 & 2, PI3, BRSV, Killed – *C. fetus*, 5 way leptospirosis, Prespense HM – *M. haemolytica*, *P. multocida*, Caliber 7 – 7 way clostridium, Autogenous Pink Eye, and dewormed with pour on Eprinex. These bulls received a negative test status for anaplasmosis and persistently infected Bovine viral diarrhoea virus prior to entering the program.

Terms and Conditions of Sale

1. Each animal will be sold to the highest bidder without reserve. However, a consignor may retain up to a one-half revenue sharing interest of semen sales. Such bulls will either be denoted in the catalog or announced from the auction box on sale day.
2. The auctioneer will settle any dispute as to bids and his decisions on such matters shall be final. Cattle will remain property of the consignor until sold.
3. Each animal will become purchaser's risk as soon as sold, although each precaution will be taken to ensure their safety.
4. A certificate of registry and transfer will be furnished for each animal sold. Transfer to be made by consignor.
5. Breeding guarantee – All bulls eligible to be sold at the University of Tennessee Bull Development and Evaluation Program annual sale has passed a breeding soundness exam (i.e., Bull has been classified as Satisfactory Potential Breeder). In case of an animal to be claimed as a non-breeder, the buyer should contact the seller, and the settlement will be decided by the buyer and seller agreement (sellers/consignors contact information are listed in this catalog). The University of Tennessee does not assume any liability for breeding guarantee.
6. Claims for refund or other adjustments. All claims for adjustment or refund for any reason must be dealt with the seller. The buyer should contact the seller and the settlement will be decided by the buyer and seller agreement (sellers/consignors contact information are listed in this catalog). The University of Tennessee does not assume any liability for refunds or other adjustments.
7. Everything possible will be done to prevent accidents. However, if any should occur, neither the owners, sales management, or other persons connected with the management of the sale, assume any liability, legal or otherwise, to persons or property. The University of Tennessee does not assume any liability for injury to the animals.
8. The terms are cash or check.
9. The above guarantees and terms shall constitute a contract between the buyer and seller of each lot and shall be equally binding upon both. Neither the sale manager nor any other person connected with the management of the sale assumes liability, legal or otherwise. The University of Tennessee does not assume any liability for any legal guarantee or condition of sale.
10. All people attending sales do so at their own risk. Neither the sale manager nor any other person connected with the management of the sale assumes any liability for the safety of the building or premises or for the behavior of the animals.

Health Status

All bulls that have been entered into the UT Bull Development & Evaluation Program have been vaccinated and received booster vaccination with:

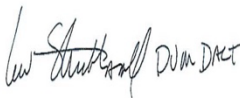

Express FP10 – MLV – IBR, BVDV 1 & 2, PI3, BRSV, Killed – *C. fetus*, Sway lepto

Presponse HM – *M. haemolytica*, *P. multocida*

Caliber 7 – 7-way clostridium

Autogenous Pink Eye

Bulls were also dewormed with pour on Eprinex. These bulls have received a negative test status for anaplasmosis and persistently infected Bovine viral diarrhea virus prior to entering the program.

A handwritten signature in black ink that reads "Lew Strickland DMV DACT". The signature is written in a cursive style.

Lew Strickland, DMV, DACT

	Genomically-Enhanced EPDs				WDA	
	CED	WW	YW	MARB		
\$B				REA		
				Claw/Ft		
	HP	MILK	DOC	HS	Notes:	

Lot - Number on the bull's visual identification ear tag. Also serves as the sale lot number.

Name – Full name as found on the bull's official pedigree as issued by the breed association.

Reg – Registration number found on the bull's official pedigree as issued by the breed association.

DOB – Date of birth

Tattoo – Number tattooed on the inside of the bull's ear(s).

EPD – Expected Progeny Difference; used to compare the expected average offspring performance for bulls of the same breed.

Percentile Rank– Ranking for individual animal in comparison to all others in the registry for a given trait.

WDA – Weight per day of age, expressed in pounds. Total weight divided by bull's age in days

Claw Set – Straightness, symmetry, and gap between claws scored from 1-9 (5 is ideal; higher or lower numbers indicate less ideal hoof structure the further they range from 5)

Foot Angle – Angle at the pastern joint, length and heel depth scored from 1-5 (5 is ideal indicating a 45-degree angle)

CED – Calving Ease Direct – predicts the average difference in ease with which a sire's calves will be born when he is bred to 1st calf heifers

BW – Birth Weight, expressed in pounds. A predictor of a sire's ability to transmit birth weight to his progeny compared to other sires

WW – Weaning Weight, expressed in pounds. A predictor of a sire's ability to transmit weaning growth to his progeny compared to other sires.

YW – Expressed in pound. A predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

MWT – Mature Weight. Expressed in pounds. A predictor of the mature weight for a sire's daughters when compared to daughters of other sires.

MILK – Maternal Milk. A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.

MCE – Maternal Calving Ease. Predicts the average ease with which a sire's daughters will calve as first calf heifers when compared to daughters of other sires.

DOC – Docility. Expressed as yearling cattle temperament.

\$W - **Weaned** Calf Value. Expressed in Dollars/head. Predicts profitability differences in progeny due to genetics from birth to weaning.

\$M – Maternal Weaned Calf Value. Expressed in Dollars/head. Predicts profitability in differences in progeny due to genetics from conception to weaning.

\$B – Beef Value. Expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits.

API – All Purpose Index. Evaluates sires for use on the entire cow herd. With the portion of their daughters retained and other heifers and steers fed out and sold.

STAY – Stayability. Percent of Daughters remaining in the cowherd at 6 years of age.

BMI – Baldy Maternal Index. Maternally focused index based on production system that uses Hereford x Angus cross cows.

TI – Terminal Index. Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

MARB – Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

REA – Ribeye Area. Expressed in square inches. A predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

CW – Carcass Weight. Expressed in pounds. A predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

TEAT – Teat Size. Predicts the difference expected in the sires' daughters' udder characteristics when managed in the same environment. Scores range from 9 (very small) to 1 (very large, balloon shaped)

UDDR – Udder Suspension. Predicts the difference expected in the sires' daughters' udder characteristics with managed in the same environment. Scores range from 9 (very tight) to 1 (very pendulous) and represent assessments of udder support.

CHB – Certified Hereford Beef Index. Terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progenies will be targeted for Certified Hereford Beef after finishing phase.

HP – Reported in percentage units. A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction.

HS – is expressed in units of hair shed score, with a lower EPD being more favorable indicating a sire should produce progeny who shed their winter coat earlier in the spring. Selection for this trait should improve the genetic potential for a sire's progeny to shed off earlier, increasing the environmental adaptability of cattle living in heat stressed areas and producers grazing endophyte-infected (hot) fescue.

B = Balanced

T = Terminal

TAEP qualifications are subject to change with latest update prior to sale. A supplement sheet will be printed two weeks prior to sale and present sale day. All EPD have accuracy greater than 0.25.
